Dear colleagues

We are pleased to welcome you to our 2nd Swiss Heart Valve Meeting (SHVM) in Lucerne.

Diagnostic and therapeutic advances in the treatment of valvular heart diseases are evolving rapidly. The meeting will provide a platform for interdisciplinary discussions of important aspects, with an emphasis on novelties. Guidelines, case studies, device innovations and new diagnostic and therapeutic options to improve patient care will play an important role. Individual experiences within the interdisciplinary HeartTeam are essential and the SHVM offers the opportunity to promote personal, professional exchange.

Our goal was a varied programme, which covers all current aspects of valvular heart diseases. You can discover the programme online (www.swissheartvalve.ch).

We thank our sponsors for their trust and valuable support of the meeting and look forward to lively and controversial discussions.

On behalf of the scientific committee

Prof. Dr. med. Peter Wenaweser
HerzKlinik Hirslanden Zurich

Prof. Dr. med. Fabien Praz
Inselspital, Universitätsspital Bern

Agenda

09:00 Welcome

Session 1: TAVI in complex anatomy: my best case

Chairs P. Wenaweser, O. Muller, E. Ferrari

09:15 Case 1: A patient with small annulus R. Jeger

09:35 Case 2: A challenging valve-in-valve implantation Ph. Haager

09:55 Case 3: My best TAVI case, single access TAVI S. Toggweiler

10:15 **Coffee break**

Session 2: TAVI and more state-of the art in 2023

Chairs nn, O. Gämperli, P. Matt

10:30 Swiss TAVI registry: update and projects S. Stortecky

10:50 The TAVI journey: what are the next steps? T. Pilgrim

11:10 Durability and mode of failure of bioprosthetic valves –
what do we know? O. De Backer

11:40 Guest lecture: Non-invasive intracardiac pressure
monitoring and its role within interventional cardiology M. Mace

12:10 **Lunch**

Session 3: Transcatheter treatment of the mitral valve

Chairs G. Pedrazzini, M. Togni, G. De Pasquale Meyer

13:10 Latest data on mitral valve repair and replacement M. Wild

Transcatheter treatment of mitral regurgitation: case examples

13:40 Case 1: My best case with Mitraclip J. Stehli

14:00 Case 2: My best case with Pascal R. Corti

14:20 Case 3: My best case with TENDYNE O. Reuthebuch

14:40 **Coffee break**

Session 4: Imaging and treatment of the tricuspid valve

Chairs D. Hagemeyer, N. Brugger, Ch. Huber

15:00 The tricuspid valve: is the new frontiers already crossed? F. Praz

Case-based discussions

15:25 Case 1: 3D TEE at its best: tips and tricks S. Stämpfli

15:45 Case 2: Fusion imaging: is it useful? P. Biaggi

16:05 Awards (best case) and wrap-up
O. Muller
P. Wenaweser
F. Praz
S. Toggweiler
E. Ferrari

16:40 Simulator workshops

17:15 **Apéro riche**
